

JSS Ayurveda Hospital

Department of Shalakyatantra
(Ophthalmology & ENT)

Manage your child's eyes better with Ayurveda.

Vision Care Through Ayurveda

Due to changing trends in lifestyle and food habits, mankind is facing miserable health issues, especially the children. In this present scenario, children's healthy lifestyle and food habits have been replaced with fast food, fast transportation and enormous exposure to audio-visuals, sedentary lifestyle and malnourishment.

As per the study, 10% of the urban children are suffering from visual disabilities like refractive errors which are the second largest cause for blindness. Short Sight (Myopia), Long Sight (Hypermetropia) and Astigmatism are commonly found refractive errors in school going children which will hinder their learning abilities. The refractive errors are characterized by blurring of vision with respect to distant or near objects, watering from the eyes, unable to see bright objects, pain in the eyes, eye strain and headache.

Ayurveda

The ancient Indian system of medicine has got a specialist branch for eye and other ENT problems called SHALAKYA TANTRA (Ophthalmology and ENT) which effectively manages and prevents refractive errors and other eye ailments by "Netra Kriya Kalpas", a specialized therapeutic procedures for eye care.

The department of Shalakyatantra (Ophthalmology and ENT), JSS Ayurveda Medical College and Hospital has planned to organize Refractive Error Camp – especially for school going children, during their summer vacations. The interested can approach the following numbers:

Department of Pediatrics (Kaumarabhritya)

With the view to achieve its ultimate aim of creating a healthy and disease free society, Ayurveda strives to make the baby healthy from the time of its conception up to the time of its growth into an adult.

Kaumarabhritya has recognized that the mental and physical state of the mother has direct links with the health of the child. Apart from this kaumarabhritya deals with various disorders concerning children's health such as gastrointestinal diseases, teething disorder, rickets other than midwifery.

JSS Ayurveda Hospital, Department of Pediatrics, mainly deals with the ailments of

children and treats their diseases, such as cerebral palsy, autism, asthma, recurrent sinusitis, concentration deficit, retention of memory and helps the students who are slow in learning.

A unique procedure, swarnaprashana medication improves overall growth of the children.
